

ezVOLTz EV Navigation app

Eliminates Range Anxiety!

INTRODUCING: A revolutionary new way to drive

ezVOLTz™ is a network and platform agnostic app for EV drivers featuring visibility of all charging stations from all charge point operators nationwide. We help you find every EV charging station, not just those on your manufacturer's network. ezVOLTz™ is available on both the iOS and Android platforms.

With ezVOLTz, you can:

- Find your next station.
- Use our smart filters to narrow searches to stations you want to find, like those that match your vehicle, or are nearby.
- Check to see if your station is available or in-service.
- Plan a trip with confidence, add stops along your route, and get turn-by-turn navigation.
- Connect to the EV driving community by leaving charging station reviews.

Available on the
App Store

Find a station, get directions, and get back on the road with confidence!

Plan a Trip with Confidence

Our powerful trip planner helps EV drivers cross the country with confidence! Our ability to show all EV stations helps you eliminate Range Anxiety - the fear of running out of battery power on the road.

Plan a Trip

Use ezVOLTz to plan your trip anywhere in the USA and eliminate Range Anxiety!

About ezVOLTz™

ezVOLTz™ is an innovative EV Charging as a Service company that provides a comprehensive, cloud-based, centralized, interconnected, and optimized enterprise grade EV Charging management solution. Combined with our ezVOLTz app, which reduces Range Anxiety by showing all available charging stations nearby and on our trip planner, we're changing the course of America's EV future.

Our ezVOLTz™ Solution

ezVOLTz™ offers the most comprehensive EV management and monetization solution that enables Consumer Charge Point Operators (CPOs) and EV Enterprise Fleet Operators to maximize their EV Infrastructure Investments. Our cloud-based EV Charging as a Service (EVCaaS) offering works with all standards-compliant EV Supply Equipment (EVSE) to manage and monetize EV traffic. Our ezVOLTz™ mobile application provides visibility and turn-by-turn navigation to all CPOs nationwide. Our cloud-based commercial fleet management platform provides capacity management, charging scheduling, dynamic load adaptation and sharing and end-to-end user cost management. Our solution is currently managing more than 1850 charging stations at 700+ locations in more than 30 countries.
